

**MARINE
PLANNED
MAINTENANCE**
FOR WINDOWS

'Simplicity is the key to Success'

A DNV type approved Planned Maintenance solution for the Maritime Industry, designed to control all aspects of ship maintenance requirements.

INTRODUCTION

The Marine Planned Maintenance package offers a simple, easy to use solution that requires minimal training and compliments any existing ISM system. Constant machinery failure causes downtime, reducing efficiency which ultimately leads to financial loss.

PLANNED MAINTENANCE FEATURES

- One stop configuration and easy setup of equipment hierarchy and easy scheduling of PM tasks based on time, machinery running hours or events
- Management and tracking of all Class and Statutory maintenance routines and certification, along with full ISM defect reporting compliance
- Full management and control from either Ship or Shore locations where data is easily exchanged via electronic data transfers
- Optional interface link with external control monitoring systems offer automatic machinery hours updates
- Option to accept data readings from RCM Marine's vibration systems
- Can be fully integrated with the *Marine Storekeeper* and *Marine Safety Manager* systems, along with the *Marine Project Manager* vessel version
- Fully type approved by DNV since June 2000
