**MARINE
PROJECT
MANAGER**
FOR WINDOWS

'Simplicity is the key to Success'

**A complete refit management solution for the Maritime Industry,
designed to manage and control all aspects of Project specifications.**

INTRODUCTION

The Marine Project Manager package has been specially designed to assist Superintendents and others engaged in annual ship repair, with the monitoring and control of costs.

PROJECT MANAGER FEATURES

- The Marine Project Manager will hold together all aspects of a refit project, from initial start through to the final project completion
- The ability of inserting photographs and drawings against any specification Job
- Combines all aspects of the specification tendering and evaluation phases
- Prepare the specification with Gantt Charts and a pre-budget estimate
- Contains all financial transactions and the ability to control multiple currencies and exchange rates
- Allows the final refit report to be compiled
- A free *'Contractor'* system which allows the contractor to electronically update the superintendent with all requested tender return prices
- The vessel version is fully integrated with the *Marine Planned Maintenance* system

OFFICE
PROJECT
MANAGER
FOR WINDOWS

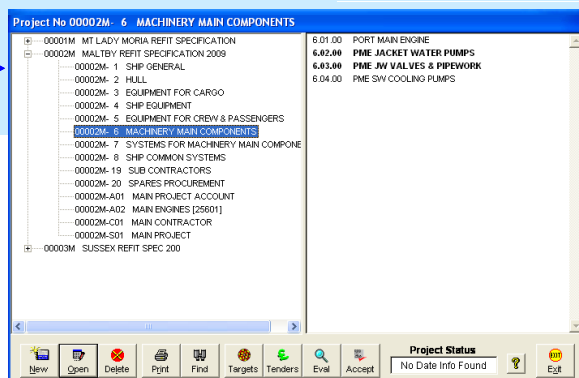

'Simplicity is the key to Success'

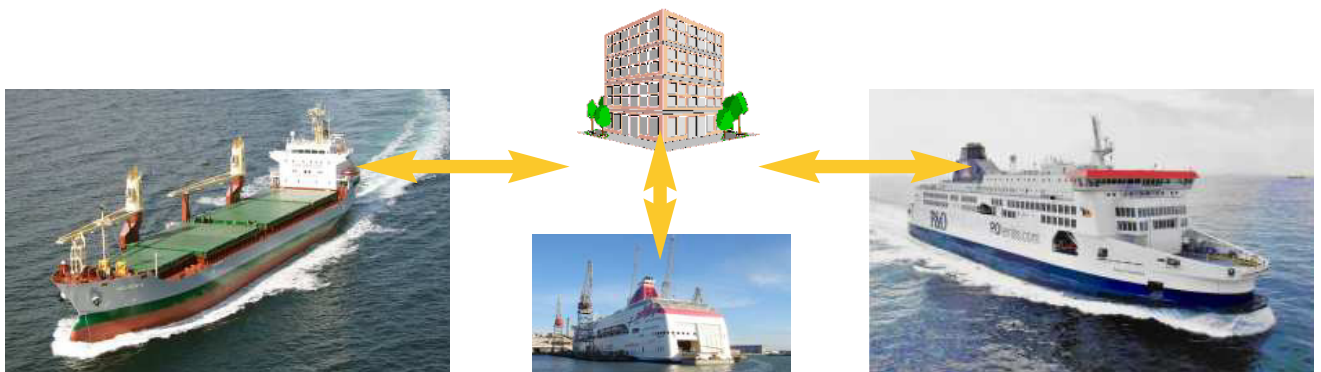

The system has an intuitive main menu layout, which guides the user through each fundamental stage of a ships refit planning

Each specification job clearly displays all associated financial information and attached photographs

The system can be run stand-alone on a superintendent's laptop whilst at refit or from a central office based server
