MARINE STOREKEEPER FOR WINDOWS

'Simplicity is the key to Success'

A complete Stock Control system tailored for the Maritime Industry, designed for control and monitoring of all ship spare parts.

INTRODUCTION

The Marine Storekeeper package offers a simple, easy to use system that enables the management of all spare parts and consumables. The system also forms a central core to the integrated Planned Maintenance and Purchasing suite.

STOREKEEPER FEATURES

- The ability of creating stock cards for each spare part to include full description, manufacturers' part number, serial and drawing numbers
- Setting various stock levels to include Maximum Stock and Re-Order Point for automatic requisitions
- The ability of nominating any spare part as *'Critical'*
- Full annual consumptions and transactional audit trail available
- Optional Barcode solution available where we can provide a laser barcode reader for efficient stock checks and issues. (Downloadable via USB port)
- Easily obtain Stock values and run various Stock reports
- External electronic documents (such as exploded diagrams) can be attached to stock cards to aid easy access
- Fully integrated with the Marine *Planned Maintenance* and *Marine Purchasing* systems to act as a software *'suite'*

OFFICE MANAGEMENT

OFFICE STOREKEEPER for WINDOWS (OSKWin) is an office based option enabling shore management to monitor onboard spares status.

Vessels can transmit current inventory status ashore on a regular basis whereby shore side can monitor stock values.
